Office Action Summary

Art Unit:2817

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-76, drawn to an amplifier system, classified in class 330, subclass 254.
- II. Claims 77-80, drawn to a variable capacitor, classified in class 361 , subclass 271.

The inventions are distinct, each from the other because:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination fails to claim the details of at least two transistors and a biasing circuit that makes up the variable capacitor of the subcombination (Note claim 1). The subcombination has separate utility such as for use in non-variable gain amplifier arrangements.

Any inquiry of a general nature or relating to the status of this application should be directed to the group receptionist whose telephone number is (703) 308-0956. FAX no. (703) 308-7724.
